PROFESSIONAL EXPERIENCE

Software Developer

November 2022 - Present

St. Joseph's Indian School | Sioux Falls, SD

- Develop software applications using ASP.NET MVC, Razorpages, Webforms, and Winforms.
- Manage multiple databases, utilizing SQL and SSMS.
- Work as a full-stack developer, handling all facets of software engineering from architecture to deployment.
 - Created an Allowance Management system for students on campus allowing the staff to manage students' weekly allowances through a financial management system.
 - Created a Health Center and Electronic Medication Administration management system for the Health Center on campus, providing the health center the ability to manage student health information, manage medication prescriptions, ensure medication administrations on the correct dates and times, as well as other features needed within the Health Center.
- Support a call center system, including scripting complex call flows and integrations with our internal systems.
 - Completed a major refactoring of the call center resulting in 22 scripts being reduced to 6 scripts.
 - Successfully added multi-number support to the call center allowing them to try additional numbers on the donors account.
 - Built a system to determine what donors we should avoid calling based on previous success and call dispositions, resulting in a reduction of 9% in calls resulting in no-answer
